CORE EXPERTISE

- Business Operations & Commercial Strategy
- Executive Decision Support through MIS
- Revenue, Profitability & Pricing Analysis
- RFQ & Opportunity Management
- Cross-functional Stakeholder Management
- Process Improvement & Operational Excellence
- Workflow Automation & Digital Transformation

EDUCATION

SASTRA Deemed to be University <i>Master of Business Administration - Finance & Marketing</i>	CGPA - 8.26 2023 - 2025
Ramakrishna Mission Vivekananda College <i>Bachelor of Commerce - Accounting & Finance</i>	CGPA - 8.10 2020 - 2023

EXPERIENCE

IM Gears Pvt. Ltd <i>Commercial Strategy & Business Operations</i>	June 2025 – June 2026
• Drove new business initiation through structured lead generation, RFQ solicitation, and end-to-end opportunity management, acting as the central coordination point between customers, cross-functional teams, and senior leadership. • Managed the complete RFQ lifecycle—from intake, evaluation, prioritization, and assignment to timely proposal submission, ensuring pipeline discipline and improved conversion through systematic customer follow-ups. • Owned Salesforce CRM administration, ensuring data accuracy, governance and visibility across opportunity stages to support informed decision-making.	

Commercial & Negotiation Support

- Managed NDA coordination and drove commercial evaluations, pricing strategies, and margin optimization efforts for new business opportunities.
- Developed cost scenarios and negotiation recommendations to strengthen customer discussions and support profitable business acquisition.

Continued...

- Governed business award tracking through customer purchase order releases, ensuring seamless handover of awarded programs into production planning and operational execution.

Analytics, Reporting & Business Insights

- Developed revenue projections, customer-level profitability analysis and performance dashboards for existing and new product portfolios.
- Conducted demand forecasting, capacity analysis and scenario planning to assess operational readiness for new programs.
- Generated sales trend, variance, lost-business and revenue scheduling reports to support strategic planning and management reviews.

Project & Change Coordination

- Coordinated task allocation, workload planning and pipeline management for engineering teams to ensure balanced execution and adherence to timelines.
- Acted as a liaison between customers and internal technical teams, improving alignment, clarity and delivery outcomes across programs.
- Maintained structured documentation, supported NPD planning and coordinated milestone-based execution to ensure timely program delivery.

Process Improvement & Digital Enablement

- Streamlined workflows and standardized trackers to improve operational visibility, accountability and execution consistency across teams.
- Applied automation-first thinking to reduce manual effort, strengthen data discipline and enable scalable, technology-enabled operating models.
